

Eight deterministic dynamic-interaction families

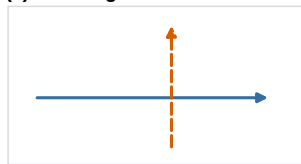

(a) head on corridor

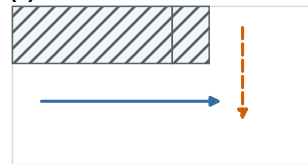

(b) doorway bottleneck

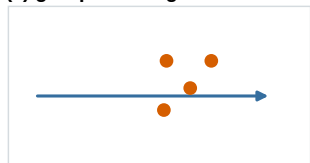

(c) crossing flow

(d) blind corner

(e) group blocking

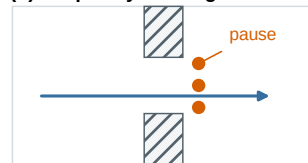

(f) overtaking

(g) opposite streams

(h) temporary blockage

— robot route - - - pedestrian route / actor ▨ static obstacle

Configured pedestrian counts: low=1, medium=2, high=4. Schematics are not to scale and contain no outcome data.
