

Matched test condition: recorded Base and PGRR navigation

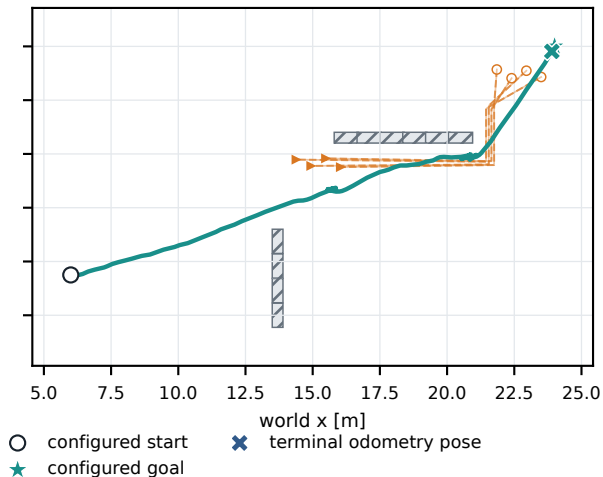

pair_id=blind_corner_high_test_moderate_v6_r00_s87320_seed87320

blind_corner / high | seed=87320 | n=1 matched pair (descriptive, not an aggregate)

(a) Base (DWB) — COLLISION

(b) PGRR — GOAL REACHED

Telemetry reconstruction—not a camera image. Robot curves: logged odometry; actor traces: logged simulator positions.
Dashed actor routes and shelf footprints: SHA-verified scenario JSON; separate from any Gazebo camera capture.
SHA-256 verified raw: Base=3b2969e6d15e..., PGRR=7c81c150788a.... Selection eligibility: PGRR trigger + geometry/routes.
Fixed rank: outcome contrast, density, triggers, family, seed, pair_id.
